Povzetek

Drugačnost tako in drugače je projekt, osnova katerega je medpredmetno povezovanje, timsko učenje in uporaba IKT. Osnovni cilj je pri dijakih razvijati kompetence medkulturnosti.

Štiri besedila iz sklopa slovenskega povojnega pripovedništva smo s pomočjo digitalnih tehnologij osvetlili s slovenističnega, sociološkega, zgodovinskega, filozofskega in psihološkega vidika.

Želeli smo si čim večjo aktivnost dijakov, zato smo pri obravnavi uporabljali IKT, ki je dijakom blizu. Dijaki so sodelovali v spletni komunikaciji na forumih, klepetalnici, izdelovali Wiki in pisali preverjanje v obliki spletnega testa. Izvedli smo tudi videokonferenco med dijaki Gimnazije Ledina ter Gimnazije Novo mesto.

S takim načinom dela so dijaki razvijali različne spretnosti in kompetence: učne, sodelovalne, interakcijske, komunikacijske ter miselne strategije, kot so ustvarjalnost, kritičnost, reševanje problemov.

Abstract

Being Different in Many Ways is a project based on cross-curricular coordination and cooperation, team work and the usage of ICT. The major objective is to develop the idea of intercultural competences. We selected four texts from the Slovene literature from the period after the Second World War, and analyzed them from a different point of view at the following subjects: Slovene, Sociology, History and Psychology.

We wanted our students to be as active as possible, and that is why we used ICT, which today's students regularly relate to. The students cooperated in various forums, chat rooms, the making of Wiki; their knowledge was tested on the Internet. We also managed to organize a video-conference between high schools Ledina and Novo mesto.

By taking part at this project, the students developed various skills and competences: learning, cooperation, interaction, communication, and not the least how to think creatively, critically, and with the ability to focus on problem-solving tasks.
