Povzetek

Pri pouku ruščine v gimnazijah, srednjih šolah ali drugje je potrebno pri delu z računalnikom uporabljati rusko abecedo oz. pisati v cirilici. Prispevek želi prikazati nekaj pristopov do tega problema in trenutno njegovo rešitev v okoljih Microsoft Windows, različnih Linuxovih distribucijah in Mac OS X.

Abstract

When learning Russian language in grammar schools, high schools or elsewhere, one is facing a huge problem – using Russian alphabet or writing in Cyrillic while working with computer. This article wants to show some approaches to this problem and possible solution for Microsoft Windows, different Linux distributions and Mac OS X.
