Povzetek

Z i-tablo in vsemi njenimi funkcijami se nekateri srečujejo komaj nekaj mesecev, nekateri pa že kar nekaj let. V tem času so največji navdušenci in najstarejši uporabniki te revolucionarne iznajdbe postali že pravi strokovnjaki, vsi pa se izobražujemo in trudimo, da bi izkoristili čim več novih, zanimivih in uporabnih možnosti, ki jih i-tabla nudi.

Pripravili smo jezikovne delavnice (francoščina, italijanščina, nemščina in angleščina), ki vključujejo kratke simulacije pouka z i-tablo in izdelovanje gradiva z osnovnimi orodji i-table. Pri delu bomo uporabljali tri različne znamke i-tabel, in sicer tiste, ki so bile sofinancirane s strani Ministrstva za šolstvo na zadnjem razpisu za strojno računalniško opremo: Hitachi, Promethean in Smart. Na primerih iz razreda bomo predstavili nekaj "trikov" za pouk tujih jezikov. Udeleženci bodo aktivni v obeh vlogah: učečega in učitelja.

Abstract

Some of language teachers have been active users of the interactive whiteboard for only a few months, but among us there are also some very experienced teachers, who have been using it for several years. While some of us are attempting to learn the basic functions of the interactive whiteboard, some enthusiasts have already become real experts in the field of this revolutionary invention. However, we are all trying to take full advantage of all the new, useful and interesting options the interactive whiteboard can offer to improve the language education.

We have prepared language workshops (French, Italian, German and English) which include classroom simulation and creating new classroom resources by using some of the basic tools the interactive whiteboard offers. We are going to work with three different brands of interactive whiteboard, those that have been co-financed by the Ministry of Education in the last bid for computer equipment: Hitachi, Promethean and Smart. We are going to present a few »tricks« we find useful in foreign language teaching. The participants in our workshops will play an active role both as students as well as teachers.
