Povzetek

V članku želim prikazati medsebojno povezavo spletnih aplikacij med sistemom za e-listovnik Mahara ter spletnimi orodji Europass. Prednost takšnega povezovanja je v tem, da uporabniku ni potrebno vpisovati podatkov v vsako spletno aplikacijo, kar mu omogoča lažjo uporabo obeh spletnih aplikacij.

Abstract

The purpose of this article is to show the connection of web applications between e-portfolio system Mahara and Europass online creation tools. The advantage of such interchange of data lies in the fact that the user does not need to enter his data into every web application. This enables him easier use of both web applications.
