

## Domače naloge preko e-pošte v 3. razredu

### Homework through E-mail

#### Povzetek

Pred učitelja se vedno postavlja vprašanje, kako motivirati učence, da domača naloga ne bo popoldanska mora, ki jo je – zaradi učitelja seveda – pač potrebno narediti. Učenci se doma velikokrat raje kot z domačo nalogo zaposlijo z drugimi stvarmi, med katere spada tudi računalnik in dan kar prehitro mine. Ideja, kako povezati domačo nalogo z računalnikom, se mi je utrnila v 3. razredu ob začetku šolskega leta. Učenci so se morali za domačo nalogo opisati in učenka je vprašala, če lahko nalogo namesto v zvezek napiše s pomočjo računalnika v Wordu. Ker se je večini učencev zdel predlog zanimiv, so imeli na izbiro – svoj opis napisati v zvezek ali pa natipkati s Wordom in ga poslati na moj e-naslov. Odziv je bil neverjeten – še isti dan so vsi učenci 3. razreda svoj opis napisali na računalnik in mi ga poslali na elektronski naslov. Na ta način je začel nastajati tudi e-portfolijo učencev 3. razreda in marsikatera domača naloga je postala prijetno opravilo.

#### Abstract

A teacher always faces the questions how to motivate students that their homework will not be an afternoon nightmare that should be bitten at for sake of - teacher of course. Pupils at home often prefer to substitute homework for other activities including computer and so the day quickly passes by. The idea to link homework with the computer occurred to me with 3rd class at the beginning of the school year. Students had to make a description of themselves for their homework. One pupil asked me if the task can be made in Word instead in the notebook. As the suggestion was interesting to a great deal of pupils, they were given the choice – to write the description in notebook or type it in a Word document and send it via e-mail to my address. The response was incredible - the same day, all 3rd class students wrote their description in Word and sent it to me via e-mail. In this manner the e-Portfolio of 3<sup>rd</sup> class pupils started and many a homework has become a pleasant task.
