Povzetek

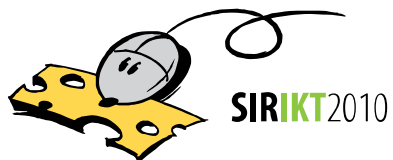

Z novimi tehnološkimi odkritji prihajajo novi načini izobraževanja in poučevanja. Vse več učiteljev uporablja splet, spletna okolja ali virtualne učilnice za posamezni predmet, na katerem objavijo ustrezno gradivo. Orodij in programov za pripravo e-gradiv je veliko. Med najbolj uporabnimi so PowerPoint, Microsoft Producer, eXe itd.

Kot primer izdelave multimedijских gradiv, smo raziskali program AuthorPoint, ki je nadgradnja programa PowerPoint in lahko ustreza zahtevni in povprečni publiki, je preproste uporabe. E-gradivo združuje PowerPoint prosojnice, avdio in video gradivo ter avtorjeve opombe v končno Adobe Flash predstavitev, uporabno je preko različnih brskalnikov, posredovano na različna spletna okolja, z dobro kakovostjo, hitrim dostopom in preprosto navigacijo. Kot primer podajamo e-gradivo o zobniških gonilih iz področja tehnike in tehnologije.

Abstract

With new discoveries there comes also new ways of education. There are more and more teachers using web, web tools and virtual classrooms for their courses where they publish their e-materials. There are many tools and applications for preparing the e-materials as are PowerPoint and Microsoft Producer, eXe etc.

As an example of preparing multimedia e-material we have researched a software tool AuthorPoint, which represents addition to the PowerPoint and is suitable to be used by a demanding or an average public, it is simple

to use. Resulting e-materials combine PowerPoint presentations with audio/video files into Flash video. E-material can be used with different web browsers, send to different web sites, with good quality, fast access and simply navigation. As an example of using AuthorPoint we present e-material from the field of technique and technology.
