Povzetek

Kako motivirati učence za učenje in delo v šoli in doma, je vedno pogostejše vprašanje, ki se dandanes pojavlja med nami. Kaj zanima učence? Kaj radi počnejo? Ta vprašanja so me pripeljala do iskanja novosti in inovativnosti pri pouku tujega jezika. Med brskanjem po svetovnem spletu sem naletela na različne mednarodne projekte in jih predstavila učencem. Učenci so bili nad njimi navdušeni.

Tako sem združila poučevanje angleščine in uporabo IKT ter motivirala učence za sodelovanje s svojimi vrstniki po svetu.

Naši projekti: Izmenjava voščilnic, Teddy bear projekt, Učni krogi.

Namen predstavitve naših projektov je predstaviti pozitivne in negativne izkušnje, ki sem jih pridobila s temi projekti in motivirati ostale učitelje za sodelovanje pri iEARN-projektih. Učenci z njimi veliko pridobijo in pouk je zanimivejši.

Abstract

How to motivate students for learning and working at school and at home is a more and more frequent question arising among us. What are students interested in? What do they like to do? These are the questions that led me to searching for novelties and innovations in foreign language teaching. While searching the world web I came across different international projects and presented them to the students. They were thrilled about international projects.

That is why I combined teaching English with the use of ICT and motivated students to co-operate with peers around the world.

Our projects: Holiday Card exchange, Teddy Bear project, Learning Circles.

The aim of the presentation of our projects is to present positive and negative experiences I have gained through these projects, and to motivate other teachers to participate in iEARN projects. The students gain a lot of experiences, and the lessons are more interesting.
