

Strukturiran pristop k preoblikovanju izobraževanja

Structured approach to educational transformation

Dr Baldev Singh,
Fellow,
Education Impact

Povzetek

Vsepovsod po svetu vodilni v izobraževanju iščejo načine, da bi bilo učenje bolj dostopno in ustrezno, da bi v učencih vzbudili naravno željo po učenju ter da bi jih pripravili na hitro spreminjajoč, povezan svet. Globalizacija in tehnologija povsod spreminjata izobraževalne sisteme ter omogočata nove priložnosti za vzgojitelje in učence, da izkusijo pospešeno in personalizirano učenje ne glede na njihovo lokacijo. Vendar te priložnosti s seboj prinesejo tudi izzive kot so obvladljivost, dostop, vzgajanje in trajnostna vprašanja. Spoznajte, kako delavnice vizij (Envisioning Workshop) lahko ponudijo učiteljem možnosti razvoja, izboljševanja in izmenjave vizije izobraževanja, kar podpira nove pobude, taktike ali reforme ne glede na obstoječo infrastrukturo in sredstva.

Abstract

Education leaders everywhere are seeking to make learning more accessible and relevant, to ignite their students' natural desire to learn and prepare them for a rapidly changing, connected world. Globalization and technology are changing educational systems worldwide, offering new opportunities for educators and students to experience accelerated and personalized learning regardless of their location. But with these opportunities come challenges such as scalability, access, training, and sustainability. Learn how Envisioning Workshops offer ways for educators to develop, refine, and share the educational vision that supports new initiatives, policies or reforms regardless of existing infrastructure and resources.
