### **Povzetek**

V slovenskih šolah so interaktivne table čedalje pogostejše. Uporabljamo jih kot navadno tablo, kot projekcijsko platno za računalniške predstavitve, za interaktivne programe ... V prispevku predstavljam še nekatere možnosti, ki jih interaktivna tabla ima. Pri interaktivni tabli je podobno kot pri računalniških programih – največkrat izkoristimo le majhen del zmožnosti. Zato predstavljam nekaj orodij interaktivne table: anagram, razvrščanje podatkov v tabeli, vrtincu, povezovanje pojmov z opisi, kviz, dopolnjevanje, spomin, vprašanja in odgovori, male sive celice, ugani pojem – vislice. Ta orodja so enostavna za urejanje in uporabo. Kar nekaj so jih izdelali učenci sami, seveda na določeno temo, da je bil izdelek uporaben pri pouku. Izdelki so zanimivi (motivacija) in uporabni tudi pri utrjevanju oz. ponavljanju učne snovi.

### **Abstract**

In Slovenian schools the interactive whiteboard becomes more and more frequent. We use them as an ordinary board, as screen for computer presentations and perhaps also for interactive programmes..... In my contribution some other possibilities are shown regarding the usage of the interactive whiteboard. We can find a similarity between the interactive whiteboard and computer programmes, namely – most of the time we use just one small part of all the possibilities they offer. Therefore, I present some tools of the interactive whiteboard; anagram, category sort in charts, in whirls, wortex sort, keyword match, multiple choice, crossword, pairs – memory, word biz, note reveal, word guess - hangman. These tools are easy to regulate and use. Some of them were edited by our pupils. They were created on a specific theme in order to make the product useful for our lessons. The products are interesting (motivation) and they can also be useful during the consolidation and repetition of the learning material.
