Povzetek

V prispevku bomo predstavili obravnavo ciljev vsebinskega sklopa ZDRAV NAČIN ŽIVLJENJA. Cilji so vezani na 2. razred osnovne šole, na spoznavanje zdravega načina življenja in skrb za osebno higieno. Opredelili bomo pojme: zdrava prehrana, osebna higiena, vsebine, obravnavane z i-tablo, pa bomo povezali s praktičnimi aktivnostmi v razredu.

Vsebine za doseganje zgoraj omenjenih ciljev bodo pripravljene tako z osnovnimi kot naprednimi orodji, ki jih ponuja programska oprema. Vsebine se bodo medpredmetno povezovala s slovenskim jezikom in matematiko.

Predstavitev bo prikazala praktično gradivo in izpeljavo učnih ur.

Abstract

In this paper we present a discussion of the objectives of the subject area of healthy way of living. The objectives are related to the 2nd grade of primary school and thus to learning about how to live healthy and take care of the personal hygiene. We will define concepts like healthy food, personal hygiene and natural science content presented with IWB along with practical experience in the classroom.

The contents to achieve described objectives will be prepared with both the basic and advanced tools offered by the software. The contents will be cross-curricular and linked to Slovenian language and mathematics. The presentation will demonstrate practical material and lesson plans.
